When I am in Southern or Northern Utah you never know what kind of reception you will ever get. So my reasoning behind buying XM Radio. I like to listen to the Traffic and weather it helps while planning trips and on my way to the destination. However my main reason for going with a purchased radio service is so I can actually listen to the damn thing. Why now would you stop me from hearing what I actually pay for rather than if it was free? I understand it actual sounds dumb to buy something you can get for free but not when you live where I do. Please don't stop weather and Traffic it would put 1 individual out of his way more times than not. Plus if you really wanna stop something that sucks stop terrorism.
